

# Freethinking Summer Camp!

Camp Quest Chesapeake is a coed residential summer camp aimed at children and teenagers from atheist, agnostic, humanist and other free-thinking families.

Our program emphasizes critical thinking, science, ethics, and a wide variety of traditional summer camp activities including arts and crafts, campfires, lake swimming, music, dance, games, sports, and cooperation courses.

We encourage campers to think for themselves, be comfortable with who they are, and engage respectfully with people who have different views.

*"I learned to be kind to others of different beliefs."*

*"I learned what a brachiopod fossil looks like."*

*"I learned that it's okay to be myself."*

*"I learned how to make ice cream."*
